Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

Sincerely,

Thomas Stachelski 213 Challedon Dr Summerville, SC 29485-7007 (910) 484-7629

Why not give corporations incentive to do something really worthwhile (clean air, save the planet...) rather than roll over and play dead?
